

How to Setup Mozilla Thunderbird

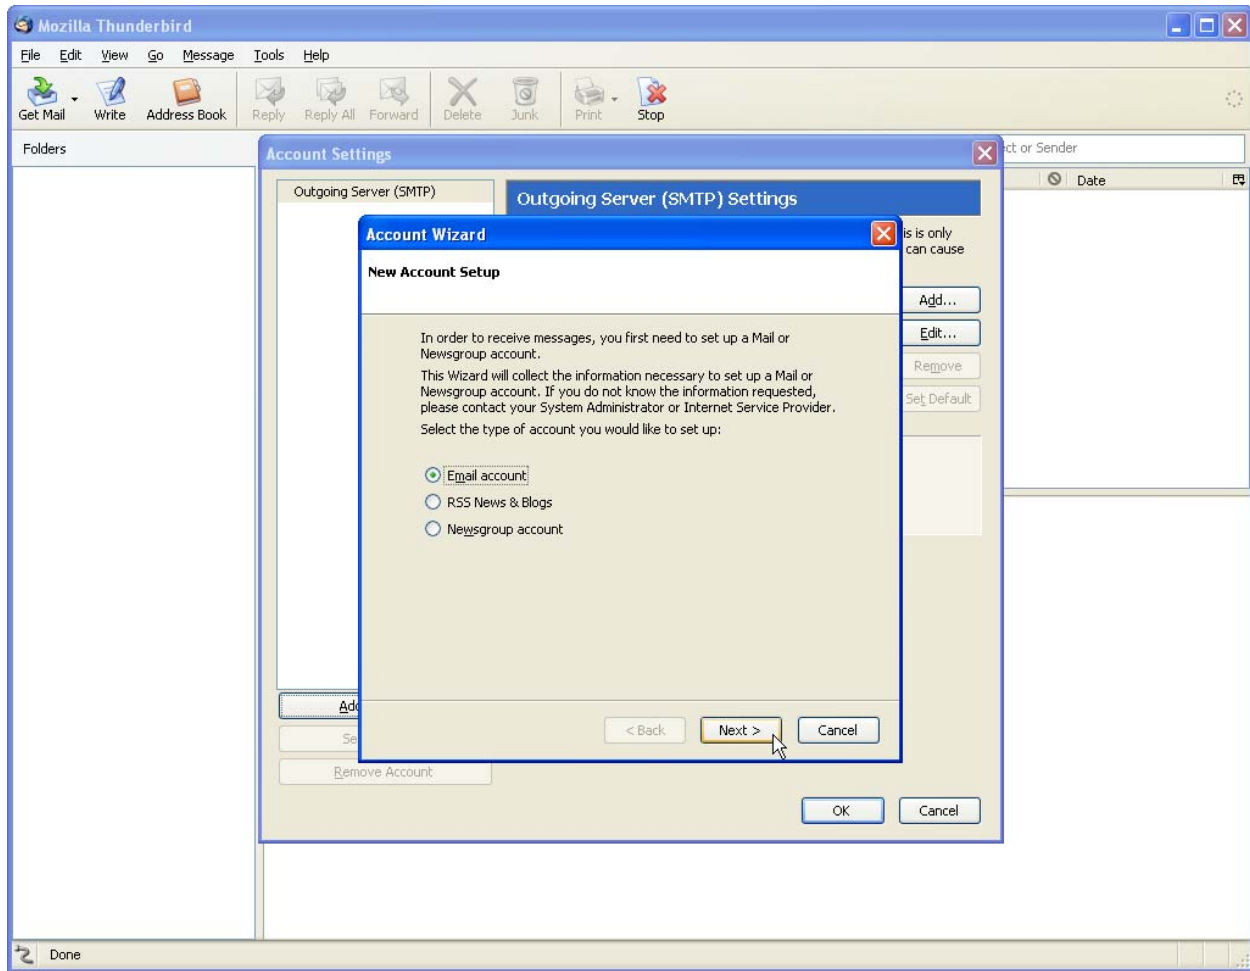

1. To begin open Mozilla Thunderbird. Select Tools from the main Toolbar, then Account Settings from the drop down menu.

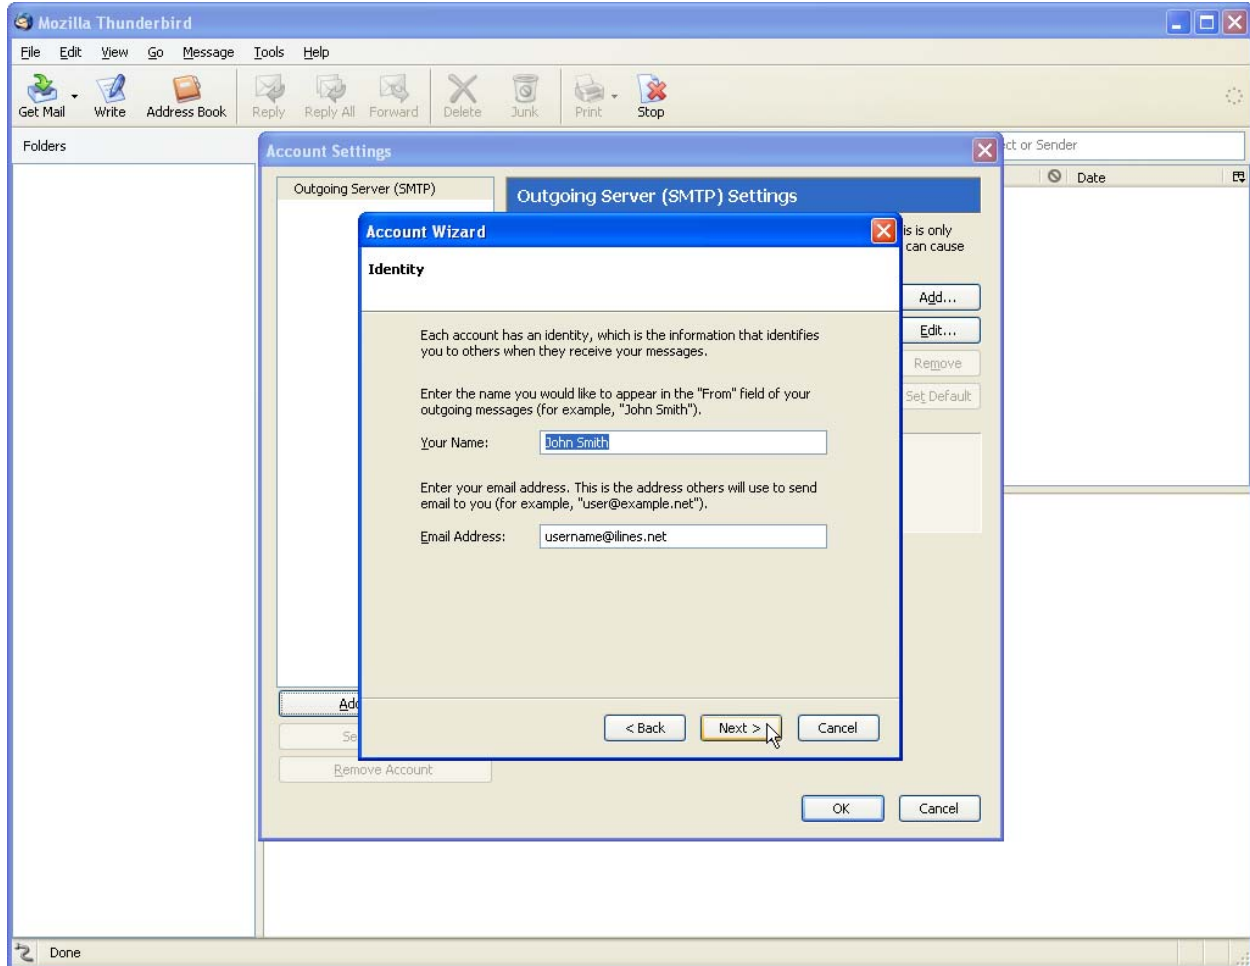

2. A new window “Account Settings” will open. Click **Add Account**, to create a new email account.

3. Select the Email account option, click **Next** to continue.

4. Enter the following information into the appropriate fields.
Your Name: The name you want to be displayed when you send out an e-mail.
E-mail Address: Type in your ilines e-mail address. (username@ilines.net)
Click **Next**.

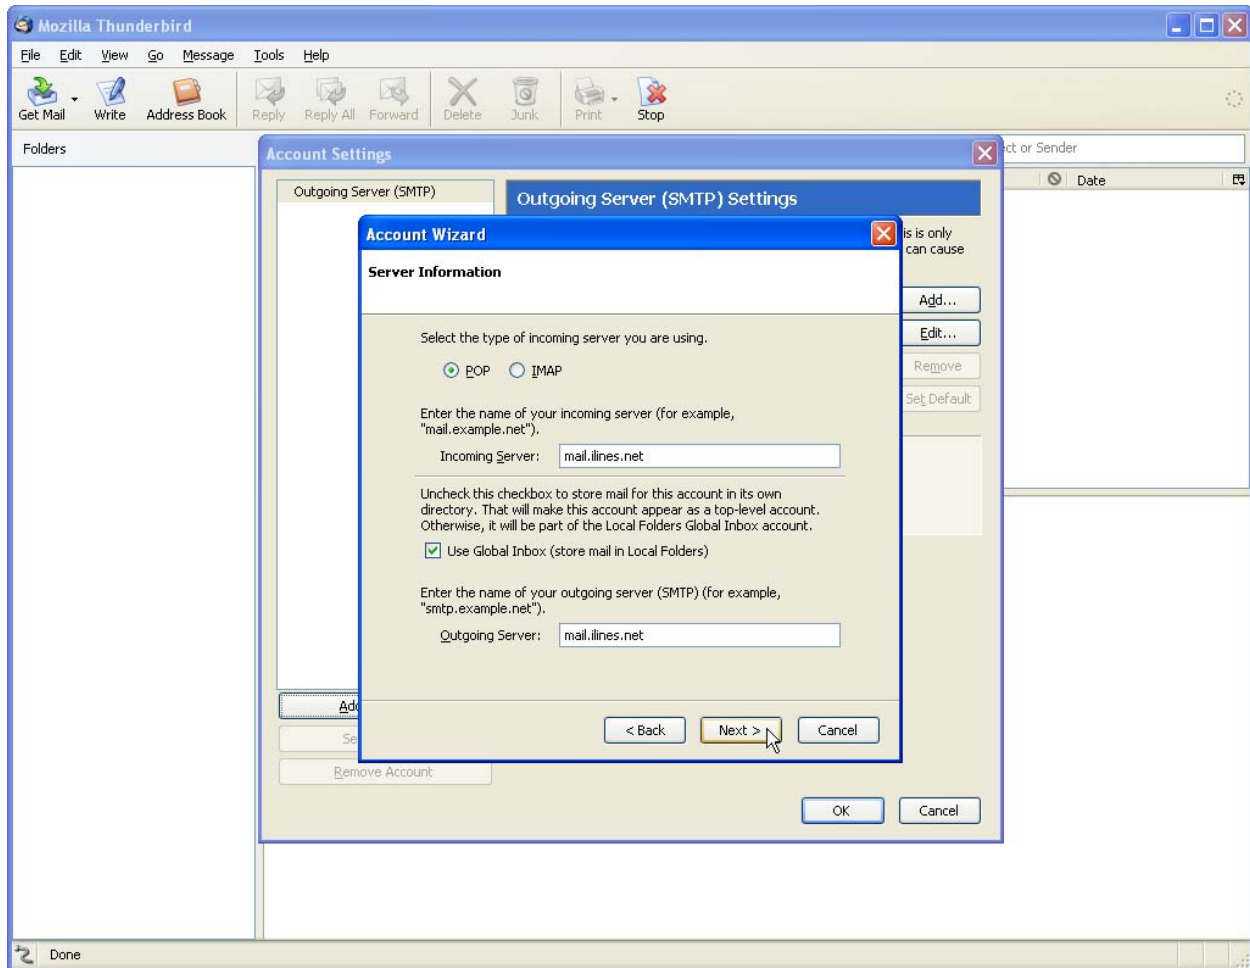

5. Ensure that the type of incoming server is set to POP.

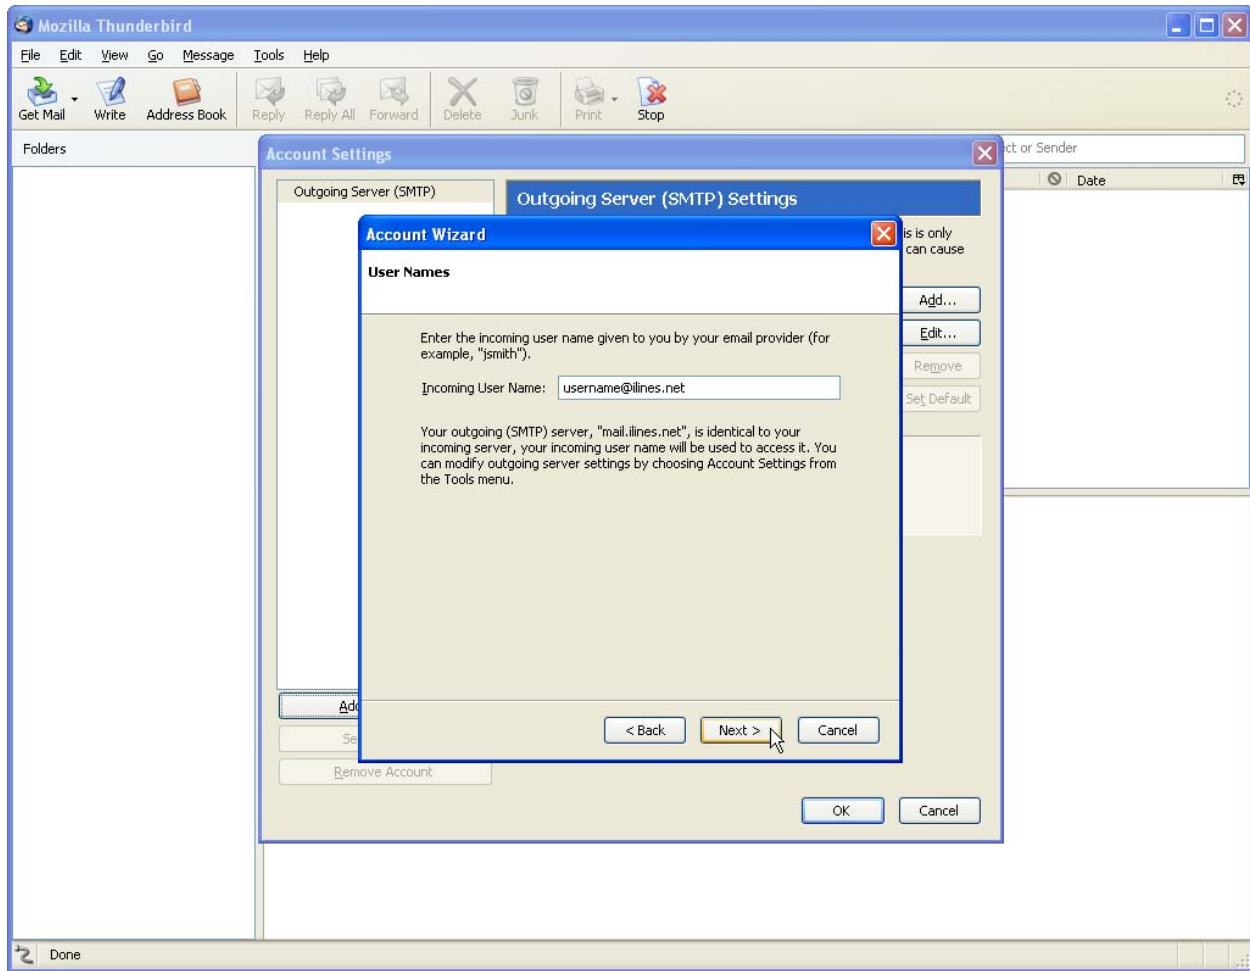

Incoming Server: mail.ilines.net

Outgoing Server: mail.ilines.net

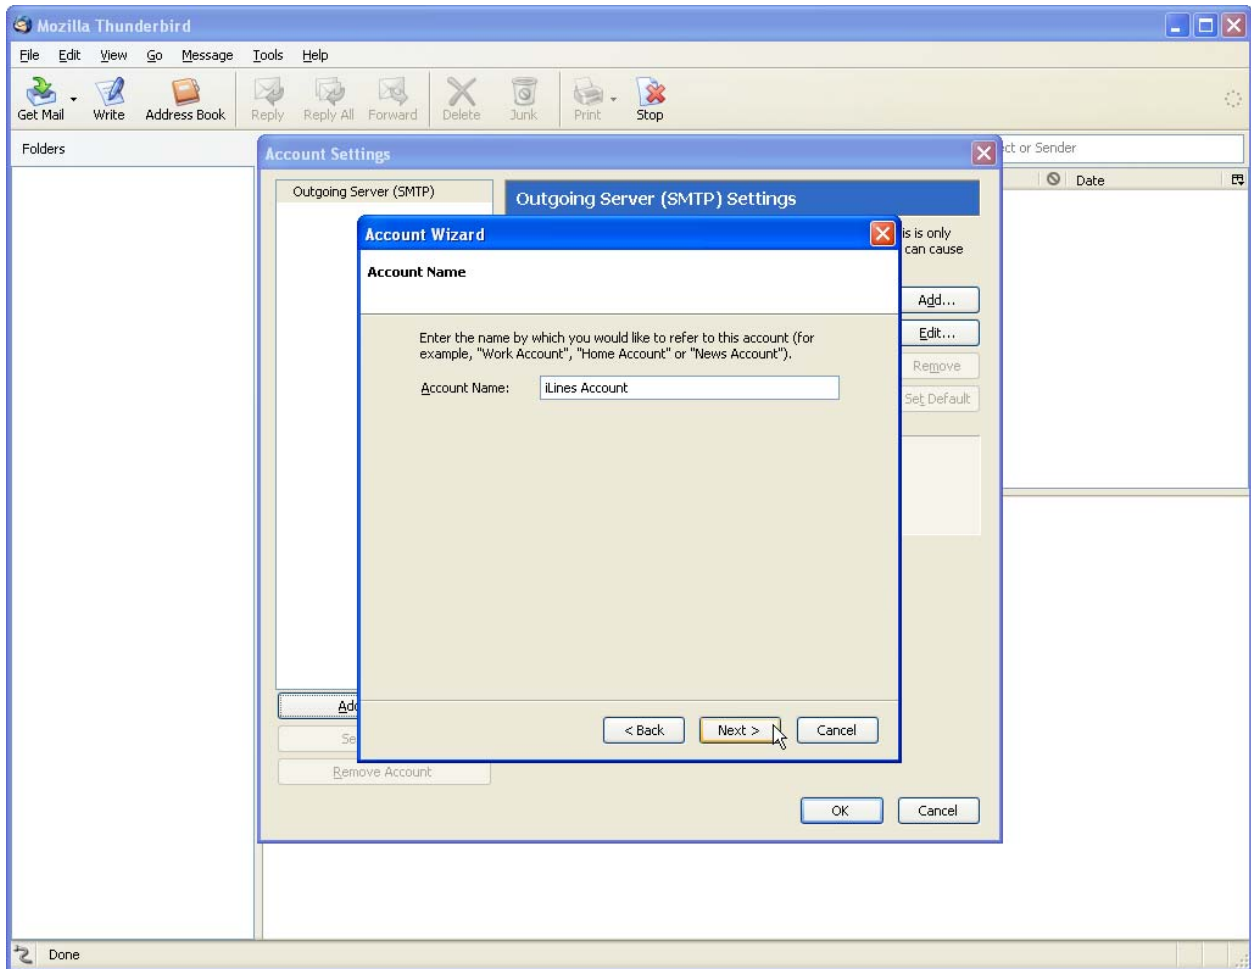

Click **Next** to continue.

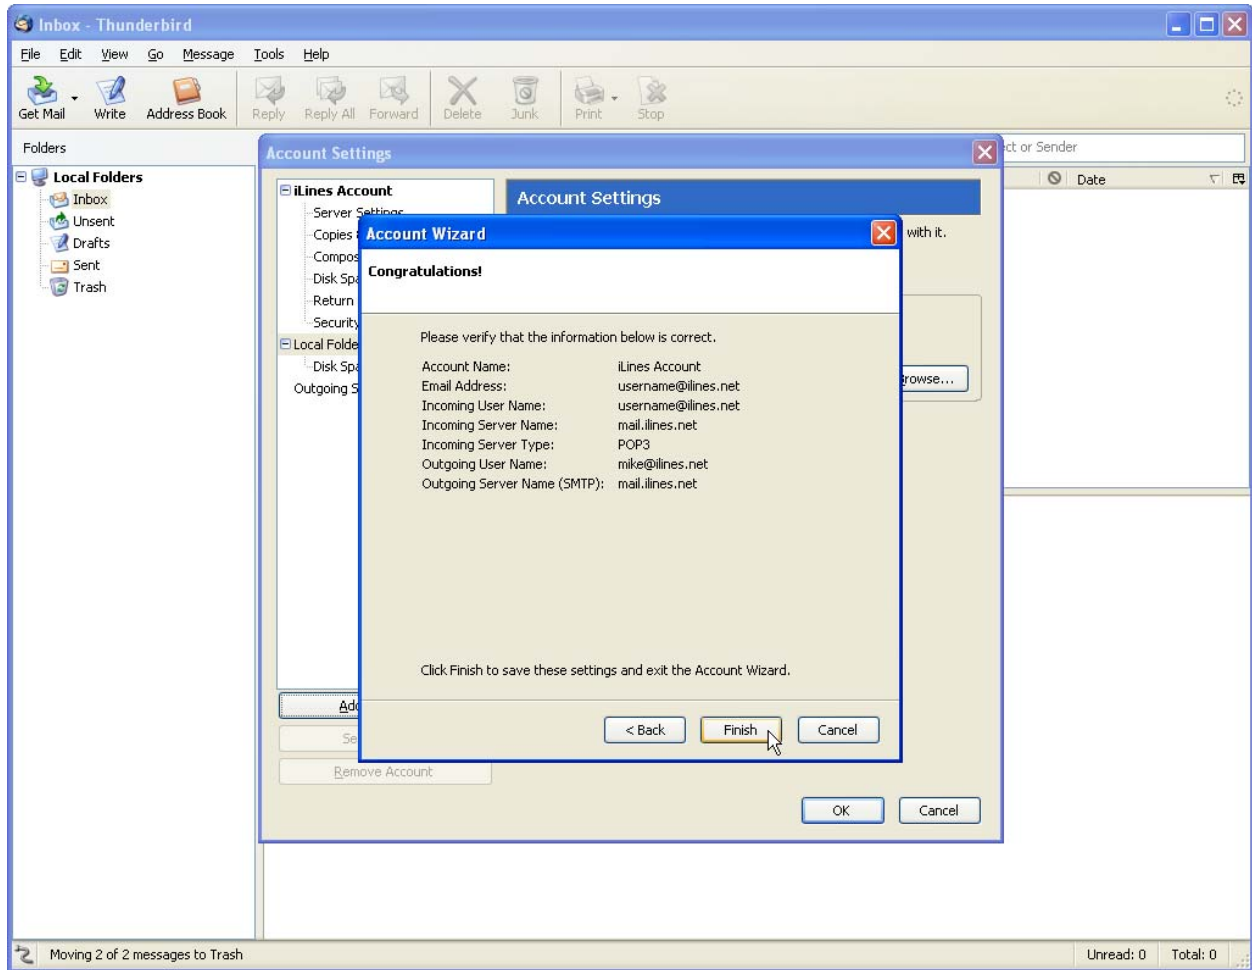

6. *Incoming User Name:* username@ilines.net
Click **Next**.

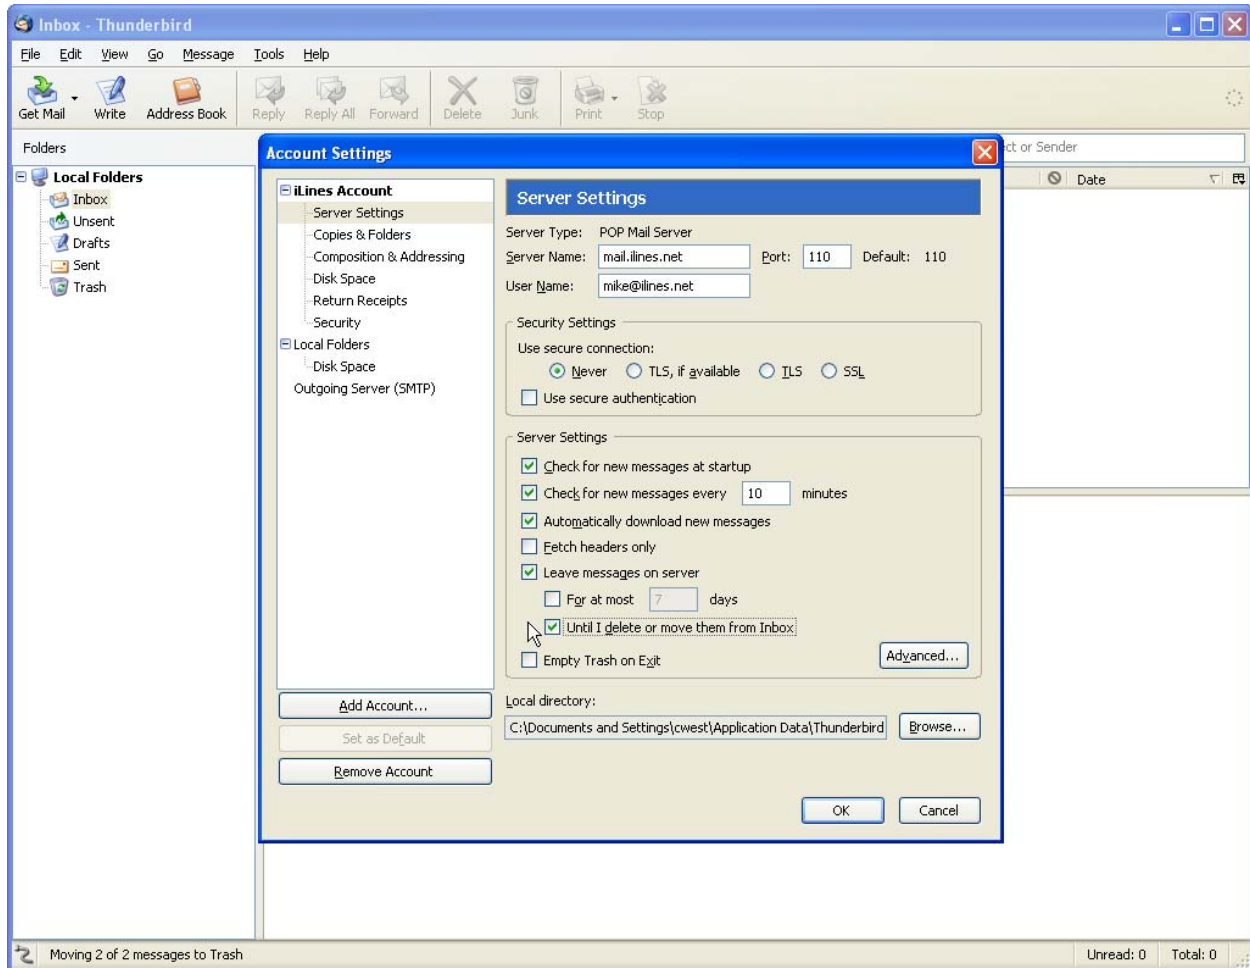

7. Account Name: iLines Account
Click Next.

8. Verify that the information that you entered is correct, if it is not, go back and make the appropriate changes. Once all the information you entered is correct, click **Finish** to complete the new email account setup.

9. The window “Account Settings” should still be up, select Server Settings under the iLines Account. Check the 2 boxes *Leave messages on server* and *Until I delete or move them from Inbox*. Click **OK** to finish.

11. Now that you have completed the E-mail account setup process, click the “Get Mail” button located at the top of the window, to receive your E-mails. If you receive any errors, please double check the information that you entered, verifying that it is correct. If you are still experiencing issues please feel free to contact iLines, so that we may aid in troubleshooting the issue.
